# 300 Trafalgar Street

Built in the 1880's for J.W. Tatton the  
Dentist

John William Tatton had set himself up as a chemist and dentist in a building on Haven Road, near Saltwater Creek Bridge, where he had his druggist store and laboratory. Tatton was one of the first dentists in the country to light his rooms with coal gas, and to use it as a source of energy in manufacturing dentures and bridges. Tatton also succeeded in making his own nitrous oxide, more commonly known as laughing gas, in the 1870's, well before it came into common usage.

JW Tatton and Son moved to the corner of Selwyn Place and Trafalgar Street and, in 1888, demolished their surgery and built themselves a fine new building, as noted in the Colonist of 29 November 1888:

*'On account of the increase in business at the dentistry establishment of Messrs Tatton and Son, of Trafalgar Street, these gentlemen have decided to pull down their present building and erect a much larger one. The frontage to Trafalgar Street will be 37 feet, and to Selwyn Place 80 feet for the main building. The lower portion will consist of two large waiting rooms, surgery and workshops and a spacious hall'.*

Waimea County Council acquired the building in 1920 and built the rear masonry section as a County Boardroom.

The building still stands today and is one of the few buildings erected in that era to continue to grace Trafalgar Street, just now without any dentist's drills!

-Humphrey Bogart

# THE NEGRONI MENU

While the drink's origins are unknown, the most widely reported account is that it was first mixed in Florence, Italy, in 1919, at Caffè Casoni (formerly Caffè Giacosa), located on Via de' Tornabuoni and now called Caffè Roberto Cavalli. Count Camillo Negroni concocted it by asking the bartender, Fosco Scarselli, to strengthen his favorite cocktail, the Americano, by adding gin rather than the normal soda water. The bartender also added an orange garnish rather than the typical lemon garnish of the Americano to signify that it was a different drink.

## GLASS POUR UNDER CORAVIN

The CORAVIN™ Wine System gives the freedom to pour and enjoy a glass of wine from any bottle at any time. By inserting a medical grade needle through the cork and injecting 99.9% pure argon gas, the bottle is pressurized and wine is being pushed out. When finished, the needle is pulled out and the cork reseals due to its elasticity, no air has gone into the bottle and the remaining wine can be preserved and continue to age. Giving us the ability to offer wines which are not normally found by the glass and reducing the need to buy a full bottle.

Our "take" on the traditional Arabian beverage. Gunpowder Green tea is blended with aromatic Peppermint leaves from Oregon to impart a unique brisk green tea experience.

### **Organic Green with Citrus**

A hand-picked green tea from Southern India. This refreshing blend delivers the benefits associated with green tea and ginkgo, along with the bright taste of natural citrus.

### **Organic Passion Plum**

Long on taste with no caffeine, this herbal brew delivers delicious taste with the added benefits of American Ginseng. Very finely cut pieces of organic hibiscus, cinnamon, rose hips, orange peel, ginger, and passion fruit. Sweet fruit flavours with a spicy twist from the cinnamon, as well as hibiscus and citrus flavours. This tea is very light in body.

### **Organic Japanese Sencha**

The Kaburagi family are well known in Tokyo and throughout Japan as a pre-eminent supplier of tea. They supply this pleasant Sencha from central Shizuoka. John Harney has drunk this tea every day for over 10 years. He values the pleasant flavour and the antioxidants. We call this Japanese Sencha because not all Sencha sold is from Japan. This is a nice blend of teas from the central Shizuoka province, and it is a very pleasant everyday tea.

### **Rooibos**

Over the last century, this legume has become quite popular. First the Afrikaans noticed it and named Rooibos (redbush) then it was sold around the world as a healthy replacement to black tea. It makes a brew that looks like a black tea, but without the caffeine. An earthy aroma and slightly nutty flavour, loaded in essential minerals.

### **Chamomile**

Calm the mind and body with this herbal tisane. The tea's unique strong scent comes from the finest handpicked Egyptian chamomile flower heads. The pale yellow brew is a delicious tea with a definite body and honey-sweet infusion. Served for centuries as a calmative, chamomile is the perfect nighttime tisane, quieting and calming.

### **Hot Cinnamon**

It's spicy! It's sweet! As delicious as candy, this medium bodied black tea is naturally sweetened to perfection by a blend of cinnamons, orange and sweet cloves. A remarkable black cinnamon flavoured tea.

### **Florence**

Our delicious Chocolate Hazelnut Tea, better known as Florence. We can't always be sipping hot cocoa while sitting in the Palazzo della Signoria. But, we can sip this decadent blend of chocolate and hazelnut and dream we are there. Some say if you add a bit of milk it tastes like Nutella, but without the calories. And that is a wonderful recommendation.

# COGNAC/ARMAGNAC/ CALVADOS

Brandy is a spirit distilled from grapes and is traditionally drunk as an after dinner digestif. The most renowned brandies come from France, more specifically the Cognac and Armagnac regions from which they take their name.

In the Cognac and Armagnac regions, brandy has a traditional age grading system. The following system is used to indicate the youngest brandy in the blend, however the average age of blended brandy might well be much older - X.O Cognac's average being upwards of 20 years.

**V.S.** (Very Special) - at least 2 years

**V.S.O.P** (Very Special/Superior Old Pale) - at least 4 years

**X.O.** (Extra Old) - at least 6 years

# GIN

Gin is a clear spirit, most often made from a grain or malt, which has the predominant flavour of juniper. Gin is usually distilled in copper pots and different gin makers use their own combination of herbs, spices and fruit to create their unique flavour.

Some people call gin a depressive spirit. I have been depressed only when I could not afford the gin I wanted and had to settle for Gordons.

# VODKA

Vodka is a spirit distilled from almost anything. It can be made from potatoes or even grapes, but the most commonly used bases include rye, wheat, barley and corn. The distilled liquor is filtered through vegetable charcoal which creates the transparency it is known for.

# WHISKEY

By definition, whiskey (or whisky, in Scotland) is a spirit distilled from fermented grain mash — grain varieties include wheat, rye, barley, corn — and then aged in wooden barrels. Whiskey is made all over the world and there are many popular styles including American Whiskey, Scotch whisky, Irish whiskey, Japanese whiskey.

## BOURBON

The most popular form of American whiskey is bourbon, which has its own specific definition. In order to be classified as bourbon it must meet specific requirements that include being made entirely in America, having a mash bill of at least 51% corn and being aged in new, charred American oak barrels.

Without America there would be no Bourbon. Some say without Bourbon there would be no America.

# TEQUILA/MEZCAL

Mezcal and tequila are spirits distilled from the agave plant. While tequila is a type of mezcal, mezcal is not a type of tequila. One distinction is that tequila must use only blue agave plants rather than any type of agave. Another distinction for the agave spirit to be classified as a tequila is that it must be produced in one of 5 specific regions in Mexico; most notably in the area surrounding the city of Tequila, in the state of Jalisco.
